# RHUL Title Page

- We (the authors of this theme) think that the title page looks better if it has the single colour footer.
- To use this option simply create your title page slide using `\rhultitlepage` (don't put it in a frame).
- If you wish to have the same footer on every slide, including title page, just create the title page in the normal way e.g. `\frame{\titlepage}`.

# Table of Contents

1 Title Page

4 One more thing

# Showing Progress Through the Presentation

- The beamer style is also able to show a table of contents whenever a new section or subsection is begun.
- These options are selected by passing the appropriate parameters when using the ISG theme.
- E.g. `\usetheme[displaytocsection]{ISG}` or `\usetheme[displaytocsubsection]{ISG}`.

# Invisible Covering/Uncovering of Content

- I'm the first item!

# Invisible Covering/Uncovering of Content

- I'm the first item!
- I was invisible!

# Invisible Covering/Uncovering of Content

- I'm the first item!
- I was invisible!
- Invisible is selected by  
`setbeamercovered{invisible}`

# Transparent Covering/Uncovering

- I'm the first item!
- I was transparent!
- Transparent is selected by  
`setbeamercovered{transparent}`

# Transparent Covering/Uncovering

- I'm the first item!
- I was transparent!
- Transparent is selected by  
`setbeamercovered{transparent}`

# Transparent Covering/Uncovering

- I'm the first item!
- I was transparent!
- Transparent is selected by  
`setbeamercovered{transparent}`

# Table of Contents

# A quirk of the ISG style

- The title page has a few “quirks” due to the way it has been implemented.
- This means that you have to build your .tex file three times before things are in the right place.
- This is less tedious if you use a make file!
